Global Health Webinar Series

The APPROACH Study (Asian Patient Perspectives Regarding Oncology Awareness, Care, and Health)

DATE: 25 SEP 20
TIME: 2PM - 3PM
VENUE: Zoom

Abstract

As with many countries around the world, countries in Asia have experienced a shift in causes of death from infectious to chronic diseases, resulting in a protracted dying process that the current healthcare infrastructure, particularly in the low- and middle-income countries of the region, is struggling to address. Moreover, these countries do not have the adequate resources or infrastructure to provide the best available treatments or systematic coverage of basic palliative care and home based services. The APPROACH study aims to fill the knowledge gap of understanding advanced cancer patients' quality of life and treatment relative to their expectations in this region. Join us as our speakers share about the different aspects of this study.
