

### **NIHA Future Leaders Programme 2019: “Health Systems Strengthening”**

The National University of Singapore (NUS) Initiative to Improve Health in Asia (NIHA) was established in 2010 with funding support from the Singapore Economic Development Board (EDB) and GlaxoSmithKline (GSK). This initiative aims to progress public health and healthcare delivery in Asia through the three integrated programmes of Leadership Development, Policy Forums and Research.

The NIHA Future Leaders Programme 2019 will be held from 2 – 6 December and aims to equip health policy leaders with insights to address pressing strategic challenges for healthcare in the Asia-Pacific region. With the theme of **Health Systems Strengthening**, the 5-day programme will use a design thinking approach to explore harnessing *health systems transformation, finance & regulatory reform* and *technological innovation* to address the challenges of healthcare systems across the region.

Building on the success of the leadership programmes in 2017 & 2018, the programme is crafted for future health policy leaders who will significantly influence the regional healthcare landscape. Through the immersive and interactive learning approach, this programme has been crafted in consultation with the Singapore Ministry of Health. Leaders, nominated as participants will have the opportunity to engage in open discussions, experience sharing and interaction with our faculty of esteemed healthcare leaders from government, industry and academia, and colleagues from different ministries of health. Together, they will gain greater understanding of the complexities of healthcare policy issues and co-create solutions to meet the challenges of healthcare systems across the Asia-Pacific.

<b>OBJECTIVES</b>	To equip current and future leaders with insights to address the strategic challenges in healthcare across the Asia-Pacific region through interactive discussions with thought leaders from government, industry and academia
<b>TARGET AUDIENCE</b>	Deputy Director General levels with the potential to become Director General and a target of 30-35 participants
<b>TOPICS</b>	Design thinking and health system, regulatory & technological innovations to address the challenges of healthcare
<b>FACILITATORS</b>	Prof John Lim, Prof Ian Curran and Dr Anne-Valerie Corboz
